AREA

Area API documentation. For every request you will need an access token in the bearer

Postman

/usermanagement

This is the part where we explain how to login and use our API

/usermanagement/login

To login you need to send via POST the user and the pass

```
curl --location --request POST 'http://localhost:8080/api/login' \
    --header 'Content-Type: application/json' \
    --data-raw '{
        "username": "ouinonbonjour",
        "password": "ouinonbonjour"
}'
```

/usermanagement/register

To register to the API use a POST request

```
curl --location --request POST 'http://localhost:8080/api/sign-up' \
    --header 'Content-Type: application/json' \
    --data-raw '{
        "username": "leosmith",
        "password": "leosmith",
        "password_repeat": "leosmith"
}'
